

The Hard Facts On Soft Cups.

4 out of 5 hygienists prefer our NL soft cup.

If you prefer a soft flexible cup then it's time you try Pivot Non-Latex Disposable Prophylaxis Angles. And why not? 4 out of 5 hygienists surveyed prefer the Pivot NL DPA with a non-latex cup over other non-latex angle brands.*

Pivot NL Angle cups are designed to be softer, more elastic, more like natural rubber. Better elasticity means our cup reaches deeper interproximally and splays into the sulcus easier, allowing for more complete cleaning and polishing.

Hygienists tell us our cups stay more concentric too, which means they spin truer, reducing splatter and providing a more predictable polishing edge . . . no “wobbling like a bad tire.”

Best of all, our soft non-latex cup comes attached to our popular runs-like-metal Pivot Disposable Prophylaxis Angle. Get the best of both worlds . . . a great angle with a great soft non-latex cup! Ask your dealer for Pivot NL Disposable Prophylaxis Angles, they're 100% guaranteed. Or call us at 1-800-474-8681 for a FREE sample.

PIVOT NL
