

Relieve Whitening Sensitivity!

Protect your patients from whitening sensitivity discomfort that can last days or weeks after any whitening treatment. Recommend Dayli®, a prescription strength 1.1% neutral sodium fluoride brush-on gel with maximum fluoride protection (5,000 ppm) and sensitivity relief (5% potassium nitrate). Dayli is sweetened with Xylitol, a proven plaque inhibitor. And Dayli's crystal clear, dye-free formula won't stain teeth and undermine your good work. Dayli is available in fresh Mint and Grape and comes with a 100% guarantee.* Ask your dealer for Dayli for dispensing to your patients or call us at 1-800-474-8681.

Clear Relief
Dayli[®]
FOR WHITENING SENSITIVITY

FOR WHITENING SENSITIVITY

1.1% Neutral Sodium Fluoride Gel
5% Potassium Nitrate

The breakdown of the peroxide in whitening products expands dentinal tubules, increasing the pulp's sensitivity to hot and cold stimuli such as food and beverages. Potential sources of irritation include exposure of the tooth to elevated temperature for an extended period of time (activating light) during bleaching, dehydration of the tooth, and the penetration of the peroxide bleaching agent into the nerve tissue.

Dayli's sodium fluoride ions infiltrate the tubules and effectively block access to the pulp chamber. Patients who brush with Dayli one to two weeks prior to whitening can remineralize tooth structure and help prevent sensitivity.

Mint **6600135** Case (12 tubes)

Item No. Quantity

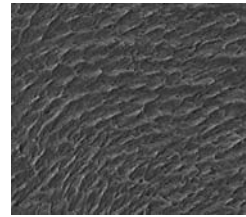

Grape **6600235** Case (12 tubes)

Maximum Fluoride Protection. Maximum Sensitivity Relief. In a Crystal Clear Prescription Strength Brush-On Gel.

- Crystal clear, dye-free formula won't stain teeth
- Maximum fluoride protection (5,000 ppm)
- Rapid sensitivity relief (5% Potassium Nitrate)
- Sweetened with Xylitol, a proven plaque inhibitor
- Available in fresh Mint and Grape

Dayli's 5% potassium nitrate works chemically by calming the nerve of the tooth, preventing the transmission of painful stimuli. Patients who brush with Dayli post whitening can receive effective sensitivity relief within two weeks.

Dayli's unique combination of remineralization and desensitizing agents provides a convenient one-step treatment for your patients. Dispensing Dayli from your office adds convenience and helps ensure immediate compliance to your treatment regime.
